Theme customization file: Download [here](#)

Modify `.gitignore`

Make sure RStudio is connected to GitHub

```
usethis::use_git()
```

```
usethis::use_github()
```

Terminal inside RStudio: Tools > Terminal > New Terminal

Make sure to deploy via GitHub (else doing it locally basically means nothing...)

```
quarto render
```

```
git add .
```

```
git commit -m "enter your commit message here"
```

```
git push
```
